

***“OPEN HEART” PILGRIMAGE TO MAGICAL,
MYSTICAL BALI (the navel of the earth)***
October 14 to October 28, 2009

You can be part of a once-in-a-lifetime event!

If your heart calls you to . . . we would like you to join us, Rose & Terry along with our guides in October 2009 for a profound healing and spiritual journey to ‘the Navel of the Earth’.

Picture yourself with your fellow pilgrims, in an emerald green Shangri-La--Earth's ultimate paradise in the magical "Island of the Gods." Open your heart to receive the blessings of this spiritual paradise as you participate in the mystical and spiritual events within the healing balm of Bali with your fellow pilgrims. As you immerse yourself in this deeply devotional culture, you will find your own slice of Shamballa (paradise) - within your heart and soul.

Visit a different kind of Bali - mystical Bali. In this enchanted island, where civilization lives in total harmony with nature and with the supernatural, our group members can explore their own spiritual awakening. Just breathing the air of Bali, and being in the group energy matrix that is created, is enough to expand your mind and open your heart. Once you have experienced the transformative powers of Bali along with the group activations and initiations, you will never be the same.

This is the next place the Masters have guided us to visit on our pilgrimages in service to the greater good of creation and the world we live in. This pilgrimage will be multifaceted in its experience as we will be sharing in various deeply spiritual ceremonies and visiting sites that few Westerners see.

This pilgrimage promises to be a wondrous adventure. We will experience the best that Bali has to offer with many unique experiences that most people do not normally have access to while visiting Bali.

We will be working with all the different levels of creation which will be assisting us in very concrete ways to bring the energy through us and anchor it to the earth. We will be experiencing the deepest and most profound ceremonies that are still performed in Bali as a part of the fabric and way of life there. Most of these ceremonies go back to Lemurian times. We will be in Bali at one of the most sacred spiritual times of their calendar, when the veils between the worlds are at their thinnest. We will also be receiving many initiations and activations through-out the time we are in Bali with Rose as the anchor to facilitate this process.

Listen to your heart as we invite you to join us on this pilgrimage of a lifetime; which will remain in its own special way, in your heart and mind throughout this lifetime.

We feel privileged to be directed by the Masters to be the leaders and guides and to bring this group of pilgrims to Bali as we create the bridge of light for the world.

Based on the directions given by the Masters things may change.
